

Dear FDA:

I am writing to express my opposition to the FDA's new proposed rule on genetically engineered foods. The voluntary labeling and notification proposals are totally inadequate to protect human health, the environment, and my democratic right to know. I fully support the following:

- All foods containing G.E. ingredients should be labeled so I am informed and can choose what I want to feed myself and my family.
- G.E. foods should not be assumed to be safe, and should be subject to mandatory pre-market safety testing.
- There should be a moratorium on G.E. foods until long-term studies show they are safe for human health and the environment.

Thank you for your attention to this letter.

Sincerely,

000_1598
